

Installing and Configuring the Windows Vista Operating System

Introduction

This three-day instructor-led course provides students with the knowledge and skills to install and configure Windows Vista desktops. It will focus on four main areas: installing, securing, networking, and browsing. By the end of the course, the student will have installed and configured a Windows Vista desktop that is secure, on the network, and ready for browsing.

This is the first course in the Windows Vista curriculum and will serve as the entry point for other Windows Vista Technology Specialist courses.

Pre-Requisites

Before attending this course, students must have:

- Familiarity with computer hardware and devices, such as the ability to look into device manager and look for unsupported devices.
- Basic TCP/IP knowledge, such as knowing why you need to have a valid IP address.
- Basic Microsoft Windows and Active Directory knowledge, such as knowledge about domain user accounts, domain vs. local user accounts, user profiles, and group membership.
- Experience with mapping network file shares, such as being familiar with UNC paths and mapping local resources to server/share.
- Experience with running commands from a command window, such as the DOS command prompt.
- Experience with reviewing BIOS settings.

Learning Solutions

Outcomes

After completing this course, students will gain the skills to:

- Install Windows Vista.
- Upgrade to Windows Vista Ultimate Edition.
- Configure post-installation system settings.
- Configure basic networking.
- Configure advanced networking.
- Configure user account security.
- Configure network security.
- Configure Microsoft Internet Explorer 7.0.

Course Details

Course code: MS 5115

Duration: 3 days

Starting time: 9.00 am

Finishing time: 4.30 pm

Lunch and refreshments are provided.

Course Outline

Ø Module 1: Installing Windows Vista

This module describes the new features of the Windows Vista operating system and then explains how to perform a clean installation. This module also explains how to install and configure Windows Vista device drivers.

Lessons

- Introduction to Windows Vista
- Performing a Clean Installation of Windows Vista
- Installing and Configuring Windows Vista Device Drivers

Lab: Installing Windows Vista

- Verifying Hardware Requirements
- Installing Windows Vista from DVD

Managing Device Drivers

After completing this module, students will be able to:

- Describe the Windows Vista operating system.
- Perform a clean installation of Windows Vista.
- Install and configure Windows Vista device drivers.

Ø Module 2: Upgrading and Migrating to Windows Vista Ultimate Edition

This module explains how to upgrade and migrate to Windows Vista Ultimate edition from previous versions of Windows and from other Windows Vista editions.

Lessons

- Upgrading and Migrating to Windows Vista from a Previous Version of Windows
- Upgrading Between Windows Vista Editions

Lab: Upgrading and Migrating to Windows Vista Ultimate Edition

- Running USMT to Scan a User's Settings
- Upgrading from Windows XP to Windows Vista Ultimate

- Upgrading from Windows Vista Business to Windows Vista Ultimate

- Running USMT to Load a User's Settings

After completing this module, students will be able to:

- Upgrade or migrate to Windows Vista from a previous version of Microsoft Windows.
- Upgrade or migrate between Windows Vista editions.

Ø Module 3: Configuring Post-Installation System Settings

This module explains how to configure the Windows Aero Experience and the Accessibility features of Windows Vista. This module also explains how to configure Parental Controls.

Lessons

- Configuring the Windows Aero Experience
- Configuring Accessibility Features
- Configuring Parental Controls

Lab: Configuring Post-Installation Options

- Configuring Aero
- Configuring Accessibility Features

After completing this module, students will be able to:

- Configure the Windows Aero experience.
- Configure the accessibility features of the Windows Vista operating system.
- Configure Windows Vista Parental Controls.

Ø Module 4: Sharing Files by Using Windows Vista

This module explains how to use Windows Vista to share files with others and also describes how to manage the various file types that Windows Vista supports.

Lessons

- Sharing Data with Others
- Managing Windows Vista Files

Lab: Sharing Files by Using Windows Vista

- Sharing Data with Others

- Managing Files

After completing this module, students will be able to:

- Share data with others.
- Manage Windows Vista files.

Ø Module 5: Configuring Advanced Networking

This module explains how to connect Windows Vista to a network, and also explains how to configure and troubleshooting the Remote Access features of Windows Vista.

Lessons

- Configuring Network Connectivity
- Configuring Remote Access

Lab: Configuring Advanced Networking

- Troubleshooting Network Connectivity
- Configuring Remote Access
- Troubleshooting Remote Access Connections

After completing this module, students will be able to:

- Configure network connectivity.
- Configure Remote Access.

Ø Module 6: Configuring User Account Security

This module explains how to configure and troubleshoot User Account Control in Windows Vista.

Lessons

- Configuring User Account Control
- Troubleshooting User Account Control

Lab: Configuring User Account Security

- Requesting an Application to Run Elevated One Time
- Making an Application to Always Run Elevated
- Configuring User Account Control Panel

After completing this module, students will be able to:

- Configure Windows Vista User Account Control.
- Troubleshoot User Account Control.

Course Outline

Ø Module 7: Configuring Network Security

This module explains how to configure the Windows Defender and Windows Firewall applications in Windows Vista.

Lessons

- Configuring Windows Defender in Windows Vista
- Configuring Windows Firewall Settings

Lab: Configuring Network Security

- Configuring Windows Defender
- Configuring Windows Firewall

After completing this module, students will be able to:

- Configure Windows Defender in Windows Vista.
- Configure the Windows Firewall settings in Windows Vista.

Ø Module 8: Configuring Internet Explorer 7.0

This module explains how to configure the Internet Explorer 7.0 options and explains how to configure the dynamic security settings.

Lessons

- Configuring Internet Explorer 7.0
- Configuring Dynamic Security for Internet Explorer 7.0

Lab: Configuring Internet Explorer 7.0

- Customizing Internet Explorer 7.0
- Troubleshooting Internet Explorer Security Settings

After completing this module, students will be able to:

- Configure Internet Explorer 7.0.
- Configure dynamic security for Internet Explorer 7.0
