## Fast Track - CERTIFICATION GUARANTEED!

The Fast Track is a seamless, integrated, flexible training solution, that combines the best of self-study, classroom and web-based training and support.

If choosing the full track, the Fast Track is two or three intensive weeks of study, with a self-study period of 6 -10 weeks beforehand, during which you receive mentoring and guidance services to assist you in completing the prerequisite study for the labs. At the end of the self-study period you undergo a pre-assessment on the Web to confirm your readiness for the intensive three weeks of study.

During the actual Fast Track, you will receive hands-on experience to practice skills that are often tested in the exams. The labs emphasise practice exercises and exam preparation, while the instructors walk through the published certification criteria, with further exam tips and guidelines interspersed.

The end result of the Fast Track is Certification. Certification is the industry benchmark amongst IT professionals. Certification provides greater job prospects, higher income potential and globally recognised qualifications. Advanced Training Guarantees this Certification if you follow the recommended study plan. We have over a 95% pass rate on the first exam sit, and an overall 100% pass rate.

You receive all your self-study materials as well, including Self Paced Manuals creating your entire MCSE Library, Digital Videos - hours of Microsoft Networking and Simulation, and a study guide to reinforce and review. Exams are all held onsite as we are also an accredited testing centre.

### Self-Study Kit

Multiple media for faster skills transfer

The multiple media self-study program is used to prepare for the classroom labs. The amount of time in the classroom is reduced because all relevant knowledge and concepts are learned from the kit before attending class.

Each learner is provided an individualised learning plan

focused on specific exam criteria not yet mastered. The self-study kit is also extremely useful as reinforcement after the Fast Track is completed.

## Mentoring Services

World-class support that guides the learner to success  
During the crucial weeks before the Fast Track Labs are conducted, Advanced Training provides mentoring and guidance services to assist participants in completing the prerequisite study for the labs. These sessions are extended to after the Fast Track labs as well. Contact is made on a regular basis: over the phone, through the Internet, and in person, if possible. Advanced Training is committed to ensuring success.

## Readiness Assessment

Benchmarks skills and guides instruction  
Before attending the Fast Track Labs, each participant takes the Readiness Assessment. This assessment serves two purposes. First, it reinforces the importance of the prerequisite assignments. If participants do not complete these activities, their likelihood of success is greatly diminished. The second use of the Readiness Assessment is for the Fast Track Lab

instructor. Trainers will be able to really understand the knowledge and skill level of each class and adjust their instruction accordingly.

## Fast Track Labs

Real-world, hands-on experience with expert instructors. The labs emphasise exam preparation and practice exercises. Instructors walk through the published certification criteria, with exam tips and guidelines interspersed. Participants will receive hands-on experience to practice skills that are often tested in the exams. Debriefings are held after each certification exam to ensure the latest information is shared with present

and future Fast Track participants. It is important to reinforce the fact that the labs will be successful only if the self-study prerequisite assignments have been completed.

## Certification

Proof of technical expertise

The end result of the Fast Track is certification, and Advanced Training guarantees this outcome if participants follow the recommended study plan. Because the study preparation and Fast Track activities are intensive, we require participants to adhere to the study plan strictly in order to qualify for the guarantee. Given this level of participant commitment, Advanced Training is accountable for producing results and guaranteeing certification.

## Microsoft Certified Systems Administrator – 10 Days

### WEEK 1

Windows 2000 Professional

**Exam 1:** 70-210 Microsoft Windows 2000 Professional

Windows 2000 Server

**Exam 2:** 70-215 Microsoft Windows 2000 Server

### WEEK 2

Windows 2000 Network Environment

**Exam 3:** 70-218 Managing a Microsoft Windows 2000 Network Environment

Windows 2000 Network Infrastructure

**Exam 4:** 70-216 Implementing and Administering a Microsoft Windows 2000 Network Infrastructure

## Microsoft Certified Systems Engineer – 15 Days

### WEEK 1

Windows 2000 Professional

**Exam 1:** 70-210 Microsoft Windows 2000 Professional

Windows 2000 Server

**Exam 2:** 70-215 Microsoft Windows 2000 Server

Windows 2000 Network Infrastructure

**Exam 3:** 70-216 Implementing and Administering a Microsoft Windows 2000 Network Infrastructure

### WEEK 2

Microsoft Windows 2000 Directory Services

**Exam 4:** 70-217 Microsoft Windows 2000 Directory Services Infrastructure

Designing Microsoft Windows 2000 Directory Services Infrastructure

**Exam 5:** 70-219 Designing Microsoft Windows 2000 Directory Services Infrastructure

### WEEK 3

Designing Microsoft Windows 2000 Network Security

**Exam 6:** 70-220 Designing Microsoft Windows 2000 Network Security

Designing Microsoft Windows 2000 Network Infrastructure

**Exam 7:** 70-221 Designing Microsoft Windows 2000 Network Infrastructure

## Microsoft Certified Solution Developer – 10 Days

### WEEK 1

Programming with Microsoft Visual Basic.NET

**Exam 1:** 70-306 Developing and Implementing Windows-based Applications with Microsoft Visual Basic.NET and Microsoft Visual Studio.NET

Programming with Microsoft ADO.NET

**Exam 2:** 70-315 Developing and Implementing Web Applications with Microsoft Visual C#.NET and Microsoft Visual Studio.NET

### WEEK 2

Developing Microsoft ASP.NET Web Applications Using Visual Studio.NET

**Exam 3:** Exam 70-305: Developing and Implementing Web Applications with Microsoft Visual Basic@.NET and Microsoft Visual Studio@.NET

Modelling Business Requirements to Create a Database Using Microsoft Visual Studio.NET Enterprise

**Exam 4:** 70-300: Analysing Requirements and Defining .NET Solution Architectures

Programming a Microsoft SQL Server 2000 Database

**Exam 5:** 70-229 Designing and Implementing Database with Microsoft SQL Server™ 2000 Enterprise Edition
