

# Course Outline

## 20342 - Advanced Solutions of Microsoft Exchange Server 2013

### General Description

This course will provide you with the knowledge and skills to configure and manage a Microsoft Exchange Server 2013 messaging environment. This course will teach you how to configure Exchange Server 2013, and it will provide guidelines, best practices, and considerations that will help you optimize your Exchange Server deployment.

### Outcomes

At the end of the course, students will be able to:

- Design and implement Exchange Server 2013 Unified Messaging.
- Design and implement site resiliency for Exchange Server 2013.
- Plan a virtualization strategy for Exchange Server 2013 roles.
- Design and implement message transport security.
- Design and implement message retention in Exchange Server 2013.
- Design and implement messaging compliance.
- Design and implement administrative security in an Exchange Server 2013 environment.
- Use the Windows PowerShell 3.0 command-line interface to manage Exchange Server 2013.
- Design and implement integration with Exchange Online.
- Design and implement messaging coexistence.
- Design and implement Exchange Server migrations from non-Exchange messaging systems, and upgrades from previous Exchange Server versions.

### Course Details

Course code: 20342  
Duration: 5 days  
Starting time: 9am  
Finishing time: 4.30pm

 **1300 86 87246**  
**1300 TO TRAIN**

### Booking guidelines

Contact our learning consultants on 1300 86 87246 and we will assist you with your booking.

# Course Outline

## ➤ **Module 1: Designing and Implementing Site Resilience**

This module explains how to design and implement site resilience for Exchange Server 2013.

### **Lessons**

- Site Resilience and High Availability in Exchange Server 2013
- Planning a Site Resilient Implementation
- Implementing Site Resilience

### **Lab: Designing and Implementing Site Resiliency**

- Implementing Site Resilience
- Validating Site Resilience

After completing this module, students will be able to design and implement site resilience for Exchange Server 2013.

## ➤ **Module 2: Planning Virtualization for Microsoft Exchange Server 2013**

This module explains how to plan a virtualization strategy for Exchange Server 2013 roles.

### **Lessons**

- Planning a Hyper-V Deployment to Exchange Server 2013
- Virtualizing Exchange Server 2013 Server Roles

### **Lab: Planning the Virtualization of Exchange Server Roles**

- Designing a Microsoft Exchange Server 2013 Deployment for a Large Organization
- Designing an Exchange Server 2013 Deployment for a Medium-Sized Organization
- Designing an Exchange Server 2013 Deployment for a Medium Complexity Organization

After completing this module, students will be able to plan a virtualization strategy for Exchange Server 2013 roles.

## ➤ **Module 3: Overview of Exchange Server 2013 Unified Messaging**

This module explains the basic concept of Unified Messaging in Exchange Server 2013.

### **Lessons**

- Overview of Telephony Technologies
- Unified Messaging in Exchange Server 2013
- Unified Messaging Components

### **Lab: Unified Messaging Overview**

- Identifying Unified Messaging Components

After completing this module, students will be able to explain the basic concept of Unified Messaging in Exchange Server 2013.

## ➤ **Module 4: Designing and Implementing Exchange Server 2013 Unified Messaging**

This module explains how to design and implement Exchange Server 2013 Unified Messaging.

### **Lessons**

- Designing a Unified Messaging Deployment
- Deploying and Configuring Unified Messaging Components
- Designing and Implementing Exchange Server 2013 UM Integration with Lync Server 2013

### **Lab: Designing and Implementing Exchange Server 2013 Unified Messaging**

- Designing the Unified Messaging Implementation
- Configuring Unified Messaging Features
- Configuring Unified Messaging Integration with Lync Server 2013
- Verify Unified Messaging Functionality

After completing this module, students will be able to design and implement Exchange Server 2013 Unified Messaging.

## ➤ **Module 5: Designing and Implementing Message Transport Security**

This module explains how to design and implement message transport security.

### **Lessons**

- Overview of Messaging Policy and Compliance Requirements
- Designing and Implementing Transport Compliance
- Designing and Implementing Active Directory Rights Management Services (AD RMS) Integration with Exchange Server 2013

### **Lab: Designing and Implementing Message Transport Security**

- Planning a Message Transport Implementation
- Implementing Message Transport Security
- Implementing AD RMS and Exchange Server Integration

After completing this module, students will be able to design and implement message transport security.

## ➤ **Module 6: Designing and Implementing Message Retention**

This module explains how to design and implement message retention in Exchange Server 2013.

### **Lessons**

- Overview of Messaging Records Management and Archiving
- Designing In-Place Archiving
- Designing and Implementing Message Retention

### **Lab: Designing and Implementing Message Retention**

- Designing Message Retention and Archiving
- Implementing Message Retention and Archiving

After completing this module, students will be able to design and implement message retention in Exchange Server 2013.

# Course Outline

## ➤ **Module 7: Designing and Implementing Messaging Compliance**

This module explains how to design and implement messaging compliance.

### **Lessons**

- Designing and Implementing Data Loss Prevention
- Designing and Implementing In-Place Hold
- Designing and Implementing In-Place eDiscovery

### **Lab: Designing and Implementing Messaging Compliance**

- Designing Messaging Compliance
- Implementing Data Loss Prevention
- Implementing In-Place eDiscovery
- Comparing Messaging Policy and Compliance Options

After completing this module, students will be able to design and implement messaging compliance.

## ➤ **Module 8: Designing and Implementing Administrative Security and Auditing**

This module explains how to design and implement administrative security in an Exchange Server 2013 environment.

### **Lessons**

- Designing and Implementing Role-Based Access Control (RBAC)
- Designing and Implementing Split Permissions
- Planning and Implementing Audit Logging

### **Lab: Designing and Implementing Administrative Security and Auditing**

- Designing a Solution
- Implementing Role-Based Access Control
- Implementing Mailbox Audit Logging
- Using Administrative Audit Logging to Troubleshoot
- Implementing and Testing Active Directory Split Permissions

After completing this module, students will be able to design and implement administrative security in an Exchange Server 2013 environment.

## ➤ **Module 9: Managing Exchange Server 2013 with Exchange Management Shell**

This module explains how to use Windows PowerShell 3.0 to manage Exchange Server 2013.

### **Lessons**

- Overview of Windows PowerShell 3.0
- Managing Exchange Server Recipients by Using the Exchange Management Shell
- Using Windows PowerShell to Manage Exchange Server

### **Lab: Managing Microsoft Exchange Server 2013 by Using Exchange Management Shell**

- Exploring the Exchange Management Shell
- Using Exchange Management Shell to Manage Recipients

After completing this module, students will be able to use Windows PowerShell 3.0 to manage Exchange Server 2013.

## ➤ **Module 10: Designing and Implementing Integration with Microsoft Exchange Online**

This module explains how to design and implement integration with Exchange Online.

### **Lessons**

- Planning for Exchange Online
- Planning and Implementing the Migration to Exchange Online
- Planning to Coexist with Exchange Online

### **Lab: Designing Integration with Exchange Online**

- Designing Integration with Microsoft Exchange Online

After completing this module, students will be able to design and implement integration with Exchange Online.

## ➤ **Module 11: Designing and Implementing Messaging Coexistence**

This module explains how to design and implement messaging coexistence.

### **Lessons**

- Designing and Implementing Federation
- Designing Coexistence Between Exchange Server Organizations
- Designing and Implementing Cross-Forest Mailbox Moves

### **Lab: Implementing Messaging Coexistence**

- Implementing Message Routing Coexistence
- Migrating User Mailboxes

After completing this module, students will be able to design and implement messaging coexistence.

## ➤ **Module 12: Designing and Implementing Exchange Server Upgrades**

This module explains how to design and implement upgrades from previous Exchange Server versions.

### **Lessons**

- Planning the Upgrade from Previous Exchange Server Versions
- Implementing the Upgrade from Previous Exchange Versions

### **Lab: Upgrading from Exchange Server 2010 to Exchange Server 2013**

- Documenting the Exchange Server 2010 Organization
- Deploying Exchange Server 2013
- Upgrading from Exchange Server 2010 to Exchange Server 2013
- Removing Exchange Server 2010

After completing this module, students will be able to design and implement upgrades from previous Exchange Server versions.
