

Course Outline

Certified Secure Computer User (CSCU)

General Description

The CSCU training program aims at equipping the students with the necessary knowledge and skills to protect their information assets. The program is designed to interactively teach the students about the whole gamut of information security threats they face ranging from identity theft and credit card fraud to their physical safety. The skills acquired during the course of this program will not only help the students to identify these threats but also to mitigate them effectively.

Audience

This course is specifically designed for today's computer users who use the internet and the www extensively to work, study and play
